

CLAY BAR (INCL. CLAY GRIP)

**INGENIOUS
CAR CARE**

Products for professionals

Description:

The Cartec Clay Bar offers a non-abrasive solution that efficiently and safely eliminates contaminants from paintwork, glass, chrome, plastic, and aluminum surfaces. Specifically designed for removing overspray and smoothing rough areas, it guarantees a flawless finish. By working on small sections with proper lubrication, this process safeguards the pristine condition of the paint. Use the clay bar prior to polishing for comprehensive decontamination, enhancing overall efficiency and achieving superior results in the polishing process.

Product benefits:

- ✓ Soft structure ensures easy shaping
- ✓ Safe for user and environment
- ✓ Scratch-free
- ✓ Long lifespan

Application:

Cartec Clay Bar removes overspray, rail dust, industrial fallout, tree resin, insect residue, brake dust, tar specks, stubborn dirt, and oxidation from acid rain.

Directions for use:

⚠ Clean the surfaces beforehand with a Cartec precleaner (1407 e.g.) and wash the car with a Cartec shampoo (1208 e.g.), to make sure all pollution is removed.

1. Apply a small amount of Cartec Clay-Grip (1541) onto a 50 x 50cm area of the surface.
2. Gently glide the Cartec Clay Bar over the polluted area with minimal pressure until the surface feels uniformly smooth to the touch.
3. Any Clay-Grip residues can be rinsed with water or wiped with a clean Cartec micro fibre cloth.
4. (optional) For best results treat the paintwork afterwards with the Cartec Refinish range, starting with Cartec Diamond Cut 3000 (REFL30).

Tips & Tricks:

- ✓ Make the most of the remaining Cartec Clay Bar to efficiently eliminate brake dust buildup from the wheel rims.
