

Technical data sheet

2024-1

9350 UHS Hardener

**High-quality, multi-purpose acrylic UHS hardener for 2K clear coats, etc.
Based on high quality isocyanate and filled with nitrogen to extend shelf life**

Mixing ratios

The mixing ratio of a specific product is written on the product label and technical data sheet (TDS). It is written in the form of a volume ratio, while the amount of diluent is expressed as a percentage (vol.%) of component A.

Some technical data sheets also provide tables with mixing ratios by weight.

Mixing ratios must be strictly observed, as failure to observe the appropriate mixing ratio can cause various defects that are noticeable immediately (influence on: drying time, application, surface smoothness, gloss...) or later (poor adhesion, loss of gloss, cracks...).

Shelf life

Min. 12 months from the production date under normal storage conditions and unopened can.

Additional information

FOR PROFESSIONAL USE ONLY!

Always read the instructions.

IMPORTANT: This product contains hazardous substances at work so it is necessary to always use/wear appropriate protective equipment. For further instructions, check the label on the product and safety data sheet. A person who uses the product for any purpose other than recommended in this technical data sheet, acts at his own risk. It is the user's responsibility to take all necessary steps to fulfil the local legislation.

Materials described are designed for application by professional, trained personnel using proper equipment and are not intended for sale to the general public.

Information and methods described are based on the best information and practices known to us and serve merely as guidelines for optimal use, without liability to performance, results or fitness for any intended use. We do not accept any responsibility for the behaviour of the product or damage arising from the use of the product. Before using the product, the user must check if this is the latest version.
