- / Non-sagging
- / Good flexibility
- / Grey anthracite colour enables over-coating with any primer filler

6040 Flexplast

Flexible putty

Drying time*

Dry to sand 20°C / 68 F	20–30 min
Potlife 20°C / 68 F	4–5 min

*Indicative times subject to amount of hardener/application/environment.

How to use?

Treated surface must be clean, dry, rust-free and grease-free. Mix the putty and hardener thoroughly until the colour is even. Use filler knife, plastic or rubber spatula for the application. Do not overdose! Excessive quantity of hardener can cause colour change on the topcoat and shorten the potlife. Hardener quantities below 2% can result in prolonged drying time.

For further and updated information please refer to the TDS published on www.silco.si.
