Products for professionals

Description:

Cartec Compound 5000 is an effective polishing compound for removing scratches, oxidation, discoloration, and other imperfections in car paint.

Product benefits:

- ✓ Effective scratch removal and other imperfections
- ✓ Suitable for freshly painted surfaces
- ✓ Economical choice
- ✓ Produces minimal dust
- ✓ Non-greasy
- ✓ Free from silicones, ammonia, and fillers

Application:

Cartec Compound 5000 is suitable for use on dull car paint, scratches, and oxidation.

Instructions for use:

1. Identify the work area within shoulder width and six times the surface area of the polishing pad.
2. Apply 3 pea-sized dots (for $\varnothing 150\text{mm}$) of Cartec Compound 5000 to the polishing pad
3.
 - Rotary: Use the Cartec yellow pad for rotary machines (RF2120 for $\varnothing 150\text{mm}$). Spread the product at the lowest speed and gradually increase the speed to 1200 - 1500 RPM.
 - Dual Action: Use the Cartec yellow pad for orbital machines (RF2126 for $\varnothing 150\text{mm}$). Spread the product at the lowest speed and gradually increase the speed to 3500 - 4800 RPM.
4. Work in sections while applying even pressure. Process the product until the scratches are removed.
5. Thoroughly clean the surface with the Cartec Microfiber Cloth Yellow (RF2205C) to remove all polishing residue.

Tips & Tricks:

- ✓ Use Cartec Panel Spray (REFLSP) to completely degrease the surface, remove remaining polish residue and review the actual condition of the paintwork.
- ✓ When using a rotary polishing machine, avoid polishing in one spot for too long to prevent overheating of the paint.

Required items:

Cartec Rotary Polishing Machine (3096/40) / Cartec Dual Action Polishing Machine (3096/60)
