

# LEATHER CREAM

Article code: ESL11-05

**INGENIOUS  
CAR CARE**

Products for professionals

## Description:

Leather Cream is the ideal product to treat and protect leather chairs and components. In addition to a new look, it also gives back moisture and smoothness to the leather.

## Benefits:

- Very easy to process
- Brings back the original color
- Result after drying not shiny or greasy
- Natural look and feel after treatment
- Gives nutrition and protection to leather
- Leather feels supple and natural after treatment
- Pleasant light leather smell
- Silicone free

## Application:

Leather Cream has been specially developed to restore used leather to its original look. The product cleans, nourishes and protects and gives extra colour depth to the leather. It is easy to apply and does not leave a greasy or shiny layer.

## Directions for use:

Apply Leather Cream evenly to the surface to be treated using a clean cloth or sponge. Leave on for 3 to 5 minutes. Then rub with a soft clean cloth for the final result. Shake well before use.

## Tips & Tricks:

Leather Cream has a cleaning effect, but to really clean dirty leather it is best to first clean it with Interior Multi Cleaner in combination with a cloth or brush. If you use a microfiber cloth to apply the Leather Cream, the layer will soon be too thin, causing the end result to be less beautiful. For this reason a sponge or brush is preferred for application.
