

2150 Trim Masking Tape

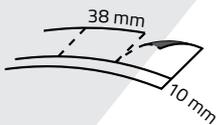

Perforated lifting tape

2150 Trim Masking Tape is brought to you to assure simple and efficient trim masking solutions, such as windscreen protection, side mouldings, inset door handles, headlight, taillight and sidelight components.

- ▶ easy corner masking
- ▶ suitable for drying processes with UV lamps
- ▶ prevents spraying onto rubbers
- ▶ efficient when using on bot even and uneven surfaces
- ▶ easy use with self-dispensing box

Without glue residues
up to 120°C

38 mm pre-cut sheets
for easier application

Water
resistant

2150 Trim Masking Tape

Perforated lifting tape

Description:

2150 Trim Masking Tape is developed so facilitate simple and efficient trim masking solutions, such as windscreen protection, side mouldings, inset door handles, headlight, taillight and sidelight components. It's masking qualities assure total paint protection under the moulding as well as preventing any overspray on the front of the moulding.

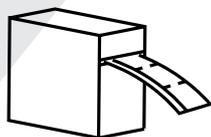

Choise of special adhesive materials ensures temperature resistance up to 120°C iwth no flue residues, while its flexible polyester band of 190um and width of 10mm ensures simple use. Perforation per every 38mm allows simple tearing application along with flexible use on different surfaces.

Technical information:

Backing	Waterproof saturated paper 78g/m ²
Adhesive	Natural rubber
Colour	Brown
Total thickness	0.140 mm
Adhesion	5 N/25 mm
Tensile strength	100 N/25 mm
Elongation	8 %
Temperature resistance	120°C (30 min)

Packaging:

Rolls of 10 metres by 52mm wide in self-dispensing packaging.

Step-by-step procedure:
