

## **7007 Rim Restore Spray**

Silver rim polish protects automotive, chrome and decorative metal rims from environmental influences, as well as from corrosion and rusting. Made on the basis of nitrocellulose and alkyd resin with high-quality aluminum pigments.

- excellent adhesion to various surfaces
- also protects chrome, metal and plastic elements
- quick drying
- high charging power, economical use
- uniform surface

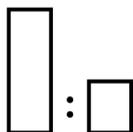

### **Substrate preparation**

---

Surfaces to be treated must be clean, dry, rust-free and grease-free.

### **Mixing ratio**

---

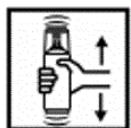

The product is ready for use!

---

### **Spraygun setup**

---

Shake the can thoroughly until the mixing balls move freely.

---

Number of coats:	2 - 3
Spraying distance:	25 - 30 cm
Flash-off between layers:	3 - 5 min
Dry film thickness:	30 - 40 µm

---

After spraying turn the can upside down and spray until the valve is clean. It is strongly recommended that ready to use product is applied at temperature above 15 °C/59 °F.

---

### **Drying**

---
